Satellite radio is a constant for me as I drive from my home in Hattiesburg,MS, to my daughter's home in Winston Salem, NC, or to my son's home in Mountain View,CA. Before satellite coverage, the drive was slow and boring with only sports talk radio or static filled commercial filled airways,if there was even anything there.Weather coverage has also been helpful as I travel across the country. Reject the NAB's petition 04-160. I should be able to choose whether I want to listen to the 60's, CNN, FOX, or the weather when I drive locally or cross country.
